

Alternative Text (ALT Text) Accessibility Procedures

Purpose	This procedure outlines the internal process for adding alternative text (ALT text) to the content in various authoring tools. More specific details can be found within individual modality policy and procedures.
----------------	---

Alt Text	ALT text refers to invisible description of images, shapes, or icons that are read aloud to visually impaired users using a screen reader. All images, shapes, and icons that are descriptive must be identifiable by alternative (alt) text.
-----------------	--

Elements are considered "descriptive" when they serve a special purpose or convey meaningful information and are used to describe, explain, or enhance the information on the page.

Alt text should describe these elements so that a person who cannot see them can understand their purpose or what they represent in the given context. Alt text's main function is to describe the visual element's content or function rather than its physical location on the screen. Screen readers will read the page content in the order that it appears in the HTML, thereby providing a sense of location.

Who this applies to?	This procedure applies to all associates within the Clinical Learning & Development (L&D) - Learning Experience Design (LED) department.
-----------------------------	--

What is in Scope?	All content developed by Clinical L&D LED associates. All content should be reviewed to determine if alt text is needed. Content development includes but is not limited to:
--------------------------	--

- eLearnings (includes videos/ecasts)
- Performance Support Tools (PSTs)
- Assessments
- Macro and Non-Macro Word Templates

Special Note: All content created via Microsoft Office will provide the Accessibility Checker in the lower left-hand corner of the screen. Selecting the option will provide inspection results where alt text is needed and accessibility guidelines to correct the issue.

Storyline 360 – Timeline Items

Follow the steps below to include Alt text for images, shapes, and icons in Storyline content.

Step	Action
1	Right-click or select Shift + F10 to access an item in the Timeline menu.
2	Select the Accessibility option in the populated list.
3	Uncheck the checkbox if the object should not be visible to accessibility tools.
4	Type in the Alternate text as needed.  Note: If the item will be used more than once within the content, select the Apply to All icon beside the ALT text field.
5	Select the Close button, X , when complete.

Storyline 360 – Slide Masters

Follow the steps below to include ALT text for images, shapes, and icons in Storyline content when using a preformatted slide deck.

Note: Although slide master objects appear in the focus order window, you'll need to switch to Slide Master View (press F4) to set their alternate text.

Step	Action
1	Select the View option above the ribbon.
2	Select the Slide Master option.
3	Select the slide needing edits.
4	Right-click or select Shift + F10 to access a line item in the Timeline menu.
5	Select the Accessibility option in the populated list.

Storyline 360 – Slide Masters, continued

Step	Action
6	Select the checkbox if the object is visible to accessibility tools.
7	Type in the Alternate text as needed. Note: If the item is used more than once within the content, select the Apply to All icon beside the ALT text field.
8	Select the Close (X) button.
9	Select Close Master View .

Storyline 360 – Media Library

Follow the steps below to include ALT text for images, shapes, and icons based on content selected in the Media Library.

Step	Action
1	Select the View option above the ribbon.
2	Select the Media Library option.
3	Select the item from the library list.
4	Enter Alt text for that object.
5	Select the Apply to All icon, located in the lower right-hand corner, if an asset has multiple alt texts and you want to make them all the same. 
6	Select the Insert Image button.

Rise 360

Follow the steps below to include ALT text for images, shapes, and icons in Rise 360 content.

Step	Action
1	Select the Edit (pencil icon) related to the image, shape, or icon within a content block.
2	Select the Edit link within the panel.
3	Select the Edit alt tag option from the drop-down list.
4	Add ALT text if your image conveys information. If it is decorative only, leave it blank (or use " "). Note: The null tag is automatically applied to images in the CMS.
5	Select the OK button. Note: In the editing view, the term ALT will appear on the picture. You can select the term to edit the alt text.

Performance Support Tools

Follow the steps below to include ALT text for images, shapes, and icons in a Performance Support Tool (PST).

Step	Action
1	Copy the CO number of the PST page.
2	Enter the CO number of the PST page into the CMS tool.
3	Select the Edit (pencil icon) to open the content in the HTML Editor.
4	Select the HTML button.
5	Use Ctrl + F to locate alt text areas, e.g.: alt=" "
6	Enter the alt text in between the quotations where needed. Otherwise, leave areas blank.
7	Select the Update button when complete. Note: You may use the QuickSteps Editor to copy and paste the CMS HTML code. Follow steps 4 and 5, then copy the code back into the CMS HTML Editor and update.
