

Wellpoint Content Framework

Purpose

Many providers send authorization requests via documents that include clinical information, which a nurse needs to review for medical necessity. This quick reference guide (QRG) gives instructions on accessing and navigating the Wellpoint Content Framework (WCF) to view document images. Field information needed for WCF can be found in applications such as the following:

- ACMP - Anthem Care Management Platform
 - WGS - Wellpoint Group Systems
 - CI&W - Claims Intake & Workflow
-

What is Wellpoint Content Framework?

Wellpoint Content Framework (WCF) is a web-based application used to search and view images. WCF houses all forms of documents that are imaged, such as:

- Scanned documents.
- Faxes.
- Electronic claims.
- Imported documents.
- Web enrollment.

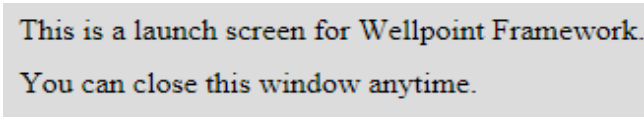

Both Microsoft Edge and Chrome can be used when accessing and using WCF.

Access and Log On to WCF

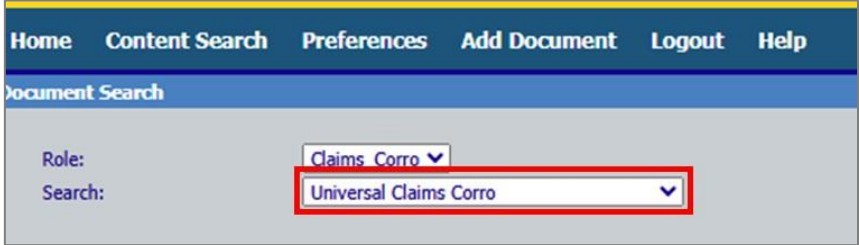

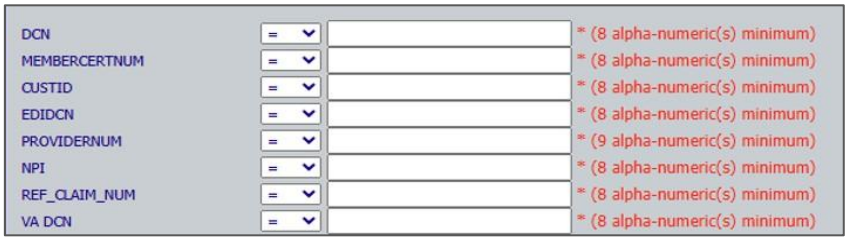

The following steps outline the process of accessing and logging on to WCF.

Step	Action
1	Access Wellpoint Content Framework.  Note: Two browser windows may open. If two windows open, you may close the “Launch” window that displays the following message (usually the bottom window). 
2	Select the Logon button or press Enter, as WCF has single sign-on access.

Navigate the Document Viewer

The following are definitions of helpful tools when viewing scanned content in the Document Viewer.

Tool	Function
	Arrows between the panes allow you to: - Maximize the image pane and hide the document properties. - View both the document properties and image pane at once. - Maximize the document properties pane and hide the document image.
	Zoom and Unzoom icons will increase and decrease the size of the page by 25%.
	Magnifier tools help enlarge specific areas to make documents easier to read when they appear fuzzy.
	Rotate tools allow you to turn pages in different directions when documents appear rotated or upside down.
	Multiple Pages icons allow you to view several pages at once, which helps find specific information in a long document.

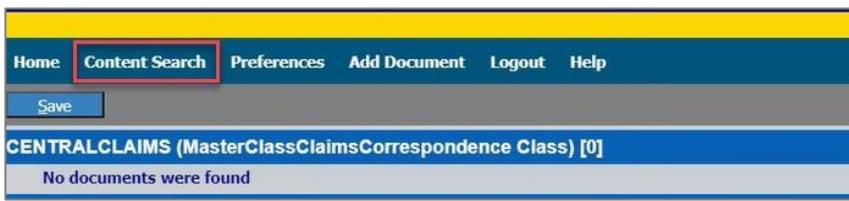

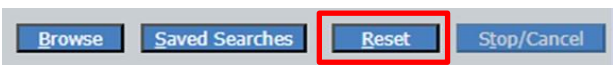

Important: You cannot copy and paste information from a document into another system, such as ACMP.
